Product & Services Overview

Add Dynamic Overlay Graphics
CAMOVERLAY APP
allows dynamic overlay graphics
in the video right on an Axis IP camera

**Weather widget** **Info ticker** **Image** **Picture in picture** **PTZ overlay**

What is CamOverlay App?

CamOverlay App is an application that allows dynamic overlay graphics in the video right on an Axis IP camera. The setup is easy. You can choose from many pre-made preset overlays.

How does CamOverlay App work?

CamOverlay App is running inside an Axis network camera. You can add weather info, sports results, or your own dynamic overlay graphics and animated GIFs into a live video stream.
What you can do with CamOverlay App?

Place info tickers and logos directly into your stream

Create your own advertising channel and promote your brand with current information, weather, sponsor logos and a PTZ compass.

Manage scoreboards for your sports events

Design your own scoreboard background, map text fields, and automate it with your scoring system.

Control your graphic overlays with Control Room

Control Room allows you to change graphic overlays and text in real time. The option to manage this via API is also available.

Features

Different graphics for each view area

Multiple simultaneous widgets

Custom graphic widget for data from CamScripter App

Picture in picture from another camera

Scheduling of graphics

Uploading custom font

CAMSTREAMER

Check our LIVE GALLERY
and see Axis cameras in action

Our apps power **more than 20,000 cameras worldwide** and many of these live cameras can be seen at **camstreamer.com/live**. In the live gallery, you can search among hundreds of beautiful well sorted streams using full-text search or filter them by category or Axis camera type.
About CAMSTREAMER

**CamStreamer is a Czech company based in Prague.
As a developer of ACAP apps and cloud solutions exclusively for Axis cameras, the company is an Axis partner for over a decade.**

CamStreamer in-camera apps can livestream with no computer/edge HW or complicated setup needed. Livestreams can be completed with dynamic overlay graphics, mixed with prerecorded videos, and sorted into playlists. External data can be embedded and visualized. The CamStreamer Cloud solution provides easy remote access to cameras without fixed IP or VPN, the ability to create dashboards, or utilize Recording and TimeLapse features.

Do not hesitate to contact us, in case of any questions!
