upgrades your Axis IP camera to  
a simple mixing studio

View from  
up to  
**5 CAMERAS**

Pick **AUDIO**  
of your  
choice

Add **VIDEO**  
clips of your  
choice

Organize  
**PLAYLISTS**

## What is CamSwitcher App?

CamSwitcher App is an ACAP application running on your camera. It can switch between up to five Axis network cameras and video clips saved on the camera's SD card. Choose master audio and generate a single output video stream in real time.

## How does CamSwitcher App work?

CamSwitcher App runs on your IP camera without any extra hardware required. The app fetches RTSP video streams from the connected cameras and switches between them to one output stream. Additionally, you can add audio and video clips stored on an SD card.

## What you can do with CamSwitcher App?

### Create an automatic playlist from multiple video sources

Combine feeds from multiple cameras into a single livestream. The playlist you create with CamSwitcher App will automatically switch between audio and video sources in a loop.

### Switch between live cameras and pre-recorded video

The perfect solution to lack of streaming content after opening hours: automatically switch between live feed and pre-recorded video saved on an SD card.

### Use multiple cameras and viewpoints at your live event

Make your live events more dynamic by using multiple cameras and switching between viewpoints and angles in real time.

## Features

Live stream with  
up to five cameras  
and A/V clips

Complete  
in-camera  
solution

Mobile-first UI  
for better user  
experience

Automated  
and manual  
switching

Playlists

Prerecorded A/V  
clips

## CamStreamer apps for a **one-time payment**

- ✓ Camera lifetime license
- ✓ No monthly fees
- ✓ Free upgrades
- ✓ 1 year free support

### CamStreamer App

# Check our **LIVE GALLERY** and see Axis cameras in action

Our apps power **more than 20,000 cameras worldwide** and many of these live cameras can be seen at [camstreamer.com/live](https://camstreamer.com/live). In the live gallery, you can search among hundreds of beautiful well sorted streams using full-text search or filter them by category or Axis camera type.

## About CAMSTREAMER

**CamStreamer is a Czech company based in Prague.  
As a developer of ACAP apps and cloud solutions exclusively for Axis cameras, the company is an Axis partner for over a decade.**

CamStreamer in-camera apps can livestream with no computer/edge HW or complicated setup needed. Livestreams can be completed with dynamic overlay graphics, mixed with prerecorded videos, and sorted into playlists. External data can be embedded and visualized. The CamStreamer Cloud solution provides easy remote access to cameras without fixed IP or VPN, the ability to create dashboards, or utilize Recording and TimeLapse features.

Do not hesitate to contact us, in case of any questions!
